## Learning by doing: students visit Japanese technology museum

*As a joint project for the Physics 11 class and the English 10 class, our DD students visited the TEPIA museum. This museum highlights some of the most current technology developed in Japan.*

*Students were able to do hands on activities facilitated by museum staff.*

*One of the English 10 projects based on an invention from TEPIA:*

## The DD program passes its annual inspection with flying colours...

**We celebrate that our BC Offshore School passed its annual inspection with excellent results! Every year the school is inspected to ensure that we meet the high standard set by the BC Ministry of Education.**

*Henry Contant came to our school as the official inspector for the Ministry of Education. He was very impressed by the excellent teaching, the hard working students and the high level exam results.*

*We were also happy to welcome Maggie Compo, our BC Offshore Consultant, who was here for two weeks to help us prepare for the inspection and to support our staff with professional development.*

*Excellent work , DD team!*

## Visit to the headquarters of Bloomberg, Japan

As part of the Planning 11 class the students were invited to spend an afternoon and hold their Junior Achievement company program meeting at the Bloomberg head office.

As part of the program they are learning about leadership, entrepreneurial skills and the job market from mentors at Bloomberg.

They also had some fun!

## Halloween at BSCIS as a language learning and cultural experience...

In Gr. 10 and Gr. 11, Halloween was celebrated with costumes, candy... and language learning activities. Great costumes!

*DD staff also contributed to the spirit of the day:*

Some beautiful projects by the Grade 11 English class. The goal of the project was to create thoughtful representations that communicate ideas and information.
